

Code	Description	Size	Colour
39180	Soudal U-Packer Mixed	600 pk	Mixed

1. Description

Soudal U-Packer Mixed provide accurate spacing and positioning of building elements.

2. Characteristics

- Recycled Polypropylene
- Stackable to create any thickness
- Can be mechanically fixed
- Durability of at least 50 years under normal use.

3. Technical Data

Visual:	Solid Form
Material:	Recycled Polypropylene
Length:	75mm
Width:	35mm
Soft Point:	100°C - 120°C
Melt Point:	160°C → 170°C
VOC:	N/A

COLOUR	THICKNESS	QUANTITY
GREY	1.00 mm	130
WHITE	1.50 mm	150
BLUE	3.20 mm	120
RED	5.00 mm	120
GREEN	6.40 mm	40
BLACK	10.00 mm	60

4. Applications

- Creating effect consistent spaces between substrates.
- Shim packing for windows and doors
- Packing out, and levelling out uneven surfaces

5. Packaging

Transparent Plastic Bucket, with 600 x U-Packers various (coloured) sizes.

Remark

The directives contained in this documentation are the result of our experiments and of our experience and have been submitted in good faith. Because of the diversity of the materials and substrates and the great number of possible applications which are out of our control, we cannot accept any responsibility for the results obtained. In every case it is recommended to carry out preliminary experiments. If any clarification is required, please contact Soudal Technical Services or email sales@soudal.co.nz.
