

HOW TO CHOOSE PVC MOULDINGS

EXTERNAL CORNER

Used when joining sheets at the corner. Giving a professional clean finish to any external corner.

INTERNAL CORNER

Used when joining sheets at the corner. Giving a professional clean finish to any internal corner.

JOINTER

Used to give a neat and tidy join between 2 sheets of wallboard or wall linings.

CAPPING

Gives you a smooth clean line for covering or capping, which gives a smooth finish along straight edges providing a clean appearance, to suit most wallboards and wall linings.

BATH FLASHINGS

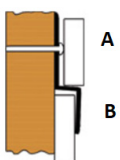

Allows you to construct a water-resistant join between the “lip of the bath” and wall, preventing moisture getting behind the connection.

90 DEGREE ANGLE

Allows you to cover any type of corner join where you can't gain access to the back of the sheet.
